

Important Notice

This is a private wilderness area, not a park. Enter this area at your own risk.

Trail conditions are continuously changing and hazards are not marked.

Hiking, running, and mountain biking on natural surface trails can be dangerous and can result in serious injury or death. Mountain biking is more dangerous than foot travel.

Do not undertake activities that are beyond your physical condition or athletic ability.

White Oak Mountain Biology Trails

Trail Difficulty Rating

- Easy
- More Difficult
- ◆ Very Difficult
- ◆◆ Extremely Difficult

Legend

1. All routes are marked with plastic trail blazes.
2. Marks painted on trees are not valid and must be ignored.
3. All colors represent routes, not individual trails.
4. ● denotes the beginning or ending of a trail.
5. - - - denotes an old trail that is no longer maintained and not recommended for travel.
6. Trails marked in **Brown** are for foot traffic only.
7. Trails marked in **Grey** are connectors.
8. Call out to make presence known at blind corners.
