

What file format should I use?

EPS – Scaleable vector format. Will print accurately but does not display well in Microsoft software (Word, PowerPoint, etc.). **Preferred for print.**

PNG – Low-res file format with a transparent background. Ideal for screen usages such as websites, PowerPoint presentations, etc. **NOT for print use.**

JPG – A low-res file format with a white background. Ideal for screen usage where the background is white. **NOT for print use.**
